

The Global Threat

My 14th thriller *The Global Threat* is a thriller that describes possible geopolitical developments in the very near future. Its plot encompasses the era from mid 2014 up to the end of July 2016. The book's various protagonists are the decision makers in several states all over the globe, which are linked to each other by mutual and contradicting state and personal interests. This thriller is a work of fiction, and is a product of the author's imagination. The protagonists and the different characters' names, and the plots' background descriptions might remind real persons and locations; as the book's purpose is to praise human wisdom, endeavors and accomplishments, there is no harm, offense or insult in its being a facsimile of real life.
